

Cut Your Lighting Bill by 50-70%

Does your building use CFL, fluorescent or HID lighting? Did you know there's a more efficient bulb now?
Now you can install the Ultra-High Efficiency—100% mercury free LED lighting on your property.

LED DOWN LIGHT

NEW
DL6TC
TAPERED CONE

If you have hallway, stairwell or outdoor lights that are fluorescent, CFL or HID, you can save a substantial amount of money, by converting to the new 50,000 hour, LED bulbs and can also gain valuable LEED points AND Federal and State Tax Credits for using energy efficient lighting. These decisions are not only a wise financial one, but an important labor saving one as bulbs last for 50,000 hours which eliminate labor costs for changing bulbs every week!

Why use L.E.D. lights?

- ✓ They use only 10% of the energy of an incandescent bulb; — one 65 watt bulb uses about \$59 of electricity each year, an L.E.D. bulb \$6.
- ✓ They're dimmable and come in all the brightness, soft light, daylight, etc.
- ✓ They last for 20 years or more & are the most energy efficient light anywhere.
- ✓ They use about half of the energy of a CFL bulb.
- ✓ CFL's contain mercury and cannot be put in the trash, and last only 2-5 years.
- ✓ They are UL Approved, Energy Star and RoHS Compliant.
- ✓ L.E.D. lights run cooler...saves on air conditioning costs.

Condominium and apartment buildings can now replace virtually every lighting application with the new LED bulbs...from a standard incandescent bulb to a recessed or chandelier bulb or T-8. They run cooler, last longer and are worry free!

We are the exclusive regional distributor for the Enlux L.E.D. lighting line and can provide you with advice, installation, retrofitting, and guidance for any application!

Call today and see how a 15 story condo building saves over \$41,392 each year in electricity costs!
